## Wonderkop Tailing Dam Facility No:6 Petition Letter

26/05/2023

This letter serves as petition letter that Wonderkop Community request assistance from NGO's **Mining Watch Canada ,Bench Marks Foundation and Earthworks** to intervene in the tailing dam (TDF 6) that is constructed behind our village without the Community engagement and consultation prior the construction of the tailing dam.

According to NEMA Act 107 of 1998 all affected parties or community should be engaged and consulted to address all the risk and safety associated with the tailing dam operations prior the commencement of the project.

The EIA report was received from Sibanye Stillwater however the EIA report is not adequate enough to address all the risk that can impact Wonderkop Community.

The EIA report is generic and not specific to the tailing dam and it talks a lot about mining operation not tailing dam e.g (stockpiles, Shafts, Plant).

All the contributing factors to the tailing dam failure are excluded; Altitude, Radius, Underground blasting, Open cast blasting and Adverse weather conditions.

All risk ratings are from Low-Medium while the tailing dam pose the Community in high risk especially when we are 1.28 Km away from the tailing dam and the tailing dam is sloping towards our community.

Community participation meeting minutes and attendance registers not attached on the EIA report (Appendix2)

The EIA report was not properly conducted we would like intervention on this matter with Sibanye Stillwater and Above mention NGO's.
